FIFRA
Section 24(c) Special Local Need Label

FOR DISTRIBUTION AND USE ONLY IN THE STATE OF IDAHO

This label for NEXTER Miticide/Insecticide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2019.

GROUP 21 INSECTICIDE

Nexter®
Miticide/Insecticide

EPA Reg. No 81880-4-10163 / EPA SLN NO. ID-150011b

For Control of Mites

ACTIVE INGREDIENT: Pyridaben **% By Wt.**
[2-*tert*-butyl-5-(4-*tert*-butylbenzylthio)-4-chloropyridazin-3(2*H*)-one] 75.0%
OTHER INGREDIENTS: 25.0%
Total 100.0%

KEEP OUT OF REACH OF CHILDREN
WARNING/AVISO

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high-water mark. Keep out of lakes, ponds, or streams. Do not contaminate water by cleaning of equipment or disposal of equipment washwaters. Do not apply when weather conditions favor drift from target area. Drift or runoff from treated areas may be hazardous to fish in adjacent sites. This product is highly toxic to bees. Do not apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treatment area. Application early in the morning or at dusk is suggested.

DIRECTIONS FOR USE

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This label and federal label for this product must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

POLLINATOR PROTECTION: This product is highly toxic to bees. Do not apply this product or allow it to drift to blooming crops or weeds while bees are foraging the treatment area. Apply Nexter Miticide/Insecticide between late evening and early morning only.

CROP	RATE OZ/ACRE	PEST	COMMENTS
Hops	10.67	Twospotted Spider Mite	Apply Nexter using conventional dilute or concentrate ground sprayers calibrated to deliver enough water to ensure thorough coverage of foliage. Nexter must be applied to each row for maximum coverage.
	RESTRICTIONS / PRECAUTIONS: • Do not apply within 21 days of harvest (PHI). • Do not make more than 1 application per season. • Do not apply by air. • For use under this SLN label do not apply this product through any type of irrigation system. • Do not rotate with a miticide with the same MOA (Group 21 Insecticide) • **Drift:** Do not apply Nexter Miticide/Insecticide when weather conditions favor drift to surface water. Do not apply within 110 feet upwind of surface water or when windspeed is above 8 mph. Do not apply during a temperature inversion.		

*** Water Soluble Bag Acre Conversions (Acres per WSB) for Various Application Rates of Nexter**

Nexter Application Rate (rate per acre) oz	Acres Treated per Water Soluble Bag (3.3oz / WSB)
10.67	0.309

To calculate the number of water soluble bags for your spray mix:
1. Determine the number of acres to be treated.
2. Locate proper application rate in the crop-specific section.

3. Divide the total number of acres to be treated by the acres treated per water soluble bag corresponding to the desired rate. (See table above for broadcast application rates and corresponding acres per bag.)
4. ***Restriction:** Do not apply more than 13 Water Soluble Bags (42.9 oz) per 4 acres.

Sample Calculations:

- If the desired application rate is 10.67 oz/acre, then acres treated/bag = 0.309
- Assuming 16 acres to be treated, 16 acres divided by 0.309 acres/bag = 52 bags.

Note: If the resulting number of bags is not a whole bag, round down to the nearest whole number of bags and check to make sure that the resulting number of acres/bags falls within the desired rate range for the application.
