**Subject:** Weed Law Changes

Matt,

I received a notice from Janis Perry c/o Brian Oakey inviting us to participate in the weed law rules or changes. I've read the proposed changes you've submitted for review and support those recommendations. I would like to ask that this discussion include the consideration of the genus "Cytisus" and all that it includes to be listed as a noxious genus. I'm aware of the hybrids of this genus that continually get shipped to box stores all over Idaho periodically and a total genus listing seems to be a great step in protecting our state. Jeffrey Pettingill informed me this procedure was done with Tamarisk for similar reasons. Any responses, questions or discussions would be welcomed. I'm planning to ask the IAWCS and IWCA to include this proposal to upcoming meeting agenda's for a vote of approval. I have contacted all our regional state legislators asking for their support as well. I'd appreciate any "procedural" information I may need.

Respectfully,

Brad Bluemer
