I just realized the comment period by email ended May 30 for the next session, is it possible to submit letters at the time of the meeting? Or enter comments for the next session after June 6th? Thank you. Melinda Marks

Hi Melinda,

Here is the information you requested for our Japanese Yew calls for the state of Idaho. Our data for your state starts in 2012 and I searched through 5/31/17. I also did a search to see if we had any animal calls-- we did not.

Typically children <= 5 years of age with exploratory ingestion of any type of berry are not going to eat enough to be a problem.

Let me know if I can be of further assistance.

Marcia RN, CSPI
